

Our Community

Parents, teachers and administrators work together to ensure the development of lifelong learners. The community works to create an environment which is supportive of the whole child. Parent volunteers are an integral part of CWA everyday life.

“CWA is very community based. Many parents get involved and communication with teachers is easy and encouraged.”

The Primary Years Programme

The Primary Years Programme (PYP) is an inquiry based curriculum which focuses on the social, physical, emotional and cultural needs of the child as well as academic ones. Through an inquiry based approach to teaching and learning, students develop the skills necessary to become and internationally-minded individual. At the heart of the curriculum is the IB Learner Profile, central to the development of the international minded person. The Learner Profile outlines the ten most important attributes of an international person and answers the question, “What do we want the children to learn?”

“The Primary Years Program gives the teachers a comprehensive framework that develops students’ international-mindedness.”

Principled

We act with integrity and honesty, with a strong sense of fairness and justice, and with respect for the dignity and rights of people everywhere. We take responsibility for our actions and their consequences.

Open-minded

We critically appreciate our own cultures and personal histories, as well as the values and traditions of others. We seek and evaluate a range of points of view, and we are willing to grow from the experience.

Caring

We show empathy, compassion and respect. We have a commitment to service, and we act to make a positive difference in the lives of others and in the world around us.

Risk-takers

We approach uncertainty with forethought and determination; we work independently and cooperatively to explore new ideas and innovative strategies. We are resourceful and resilient in the face of challenges and change.

Balanced

We understand the importance of balancing different aspects of our lives; intellectual, physical, and emotional to achieve well-being for ourselves and others. We recognize our interdependence with other people and with the world in which we live.

Reflective

We thoughtfully consider the world and our own ideas and experience. We work to understand our strengths and weaknesses in order to support our learning and personal development.

Comprehensive Approach to Learning

Inquiry

Students are immersed in inquiry-based learning, whereby guiding questions lead to new understandings. Through direct and shared inquiries, students investigate, create, and evaluate new knowledge.

Concept-Based

Units of inquiry are collaboratively written by teachers to help students learn through concepts. For example, concepts such as ecosystems, hardships and culture are explored.

Transdisciplinary

Through all disciplines; mathematics, English language arts, French, social studies, and science; students gain a better understanding of our world. In addition, art, music, physical education and the additional language of Spanish in starting in grade 3 are an integral part of teaching and learning at CWA.

Learning Opportunities

Take Action

Throughout the year, students are able to learn from the community in a variety of ways. This includes guest speakers, field trips, cross cultural opportunities and more.

As part of the learning at Children's World Academy, students are encouraged to take action in their community. Students have participate in numerous events such as raising money for many associations such as ME to WE, Montreal Children's Hospital, etc.

They also can join diverse clubs such as robotics, poetry and Physical Education tournaments.

"The program at CWA challenges students to develop academically and socially to their full potential."
